ÜBER UNS

Excellent mit Sitz in der Klingenstadt Solingen steht für Qualität „Made in Solingen“ und ist ein Spezialist in der Herstellung von hochwertigen Maniküre- und Pediküre Instrumenten. Zu unseren Produktsortiment gehören Nagel- und Hautzangen, Haut- und Nagelscheren sowie Feilen und Klingen.

Excellent, located in the city Solingen, stands for quality „Made in Solingen“ and is a specialist in the production of high quality manicure and pedicure instruments. Our product range includes nail and cuticle nippers, skin and nail scissors, files and blades.

Zangen | Nail clipper | Pince à ongles | Cortaúñas

For manicure and pedicure we offer in our assortment nail nippers, corner nippers, cuticle nippers as well as cuticle clippers. Different sizes and cutting head shapes of the nippers indicate the different application possibilities in the manicure or pedicure.

Nail nippers, corner nippers and cuticle nippers are available in various designs, each with different lengths and cutting edges, among other things, you will find nail nippers with different springs such as the buffer spring, double spring or the folding spring. Nail nippers and nail clippers are particularly well suited to shorten the nails and to shape them, it is recommended to cut the nails after showering or bathing, as the nails are then soaked and can be cut particularly easily.

Besides pliers for manicure and pedicure, we also offer orthonyxie pliers, such as tweed pliers or sidecutters. These pliers have specially shaped cutting edges, which are designed for special use.

Nail clippers are particularly suitable for cutting corner nails or ingrown nails due to the straight cutting edge. Due to the double cross spring, even harder nails can be cut with little effort. All our nail nippers have a screwed double spring and a brushed surface. Our nail nippers are made of hygienic, stainless steel that can be sterilized. Excellent offers nail nippers in various designs and greetings, both for use in manicure as well as pedicure. The cutting surfaces of a nail nipper are sharp to achieve an even cut. With the help of the double fields or buffer spring is also possible to cut firm nails.

Double instruments are particularly suitable for the care of interstices. These instruments are essential for manicure and pedicure. The double instruments include nail cleaners, cuticle pushers, cuticle knives and corner lifters or corner files. All Excellent double instruments have a ribbed grip surface and sit securely in the hand, protecting against unpleasant injuries. Excellent offers all double instruments not only in the standard size of 17 cm, but also in smaller sizes of up to 9 cm. If you need other sizes, please feel free to contact us.

Art. No. 12045: Corner file & Cuticle pusher

Art. No. 12021 Ointment spatula wide & single sided

Art. No. 11014 Corner file with probe

Corner lifter

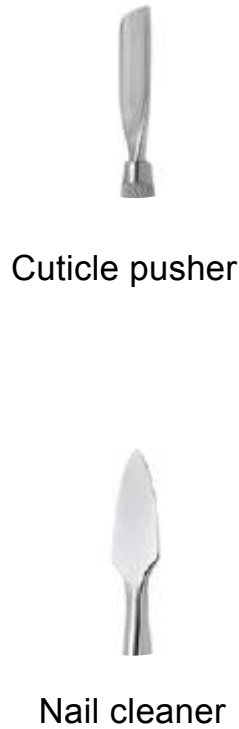

Corner lifters are used for inserting tamponades and lifting, cleaning and probing the nail. Corner lifters can also be used for gentle work on the nail fold, nail corners or cuticles.

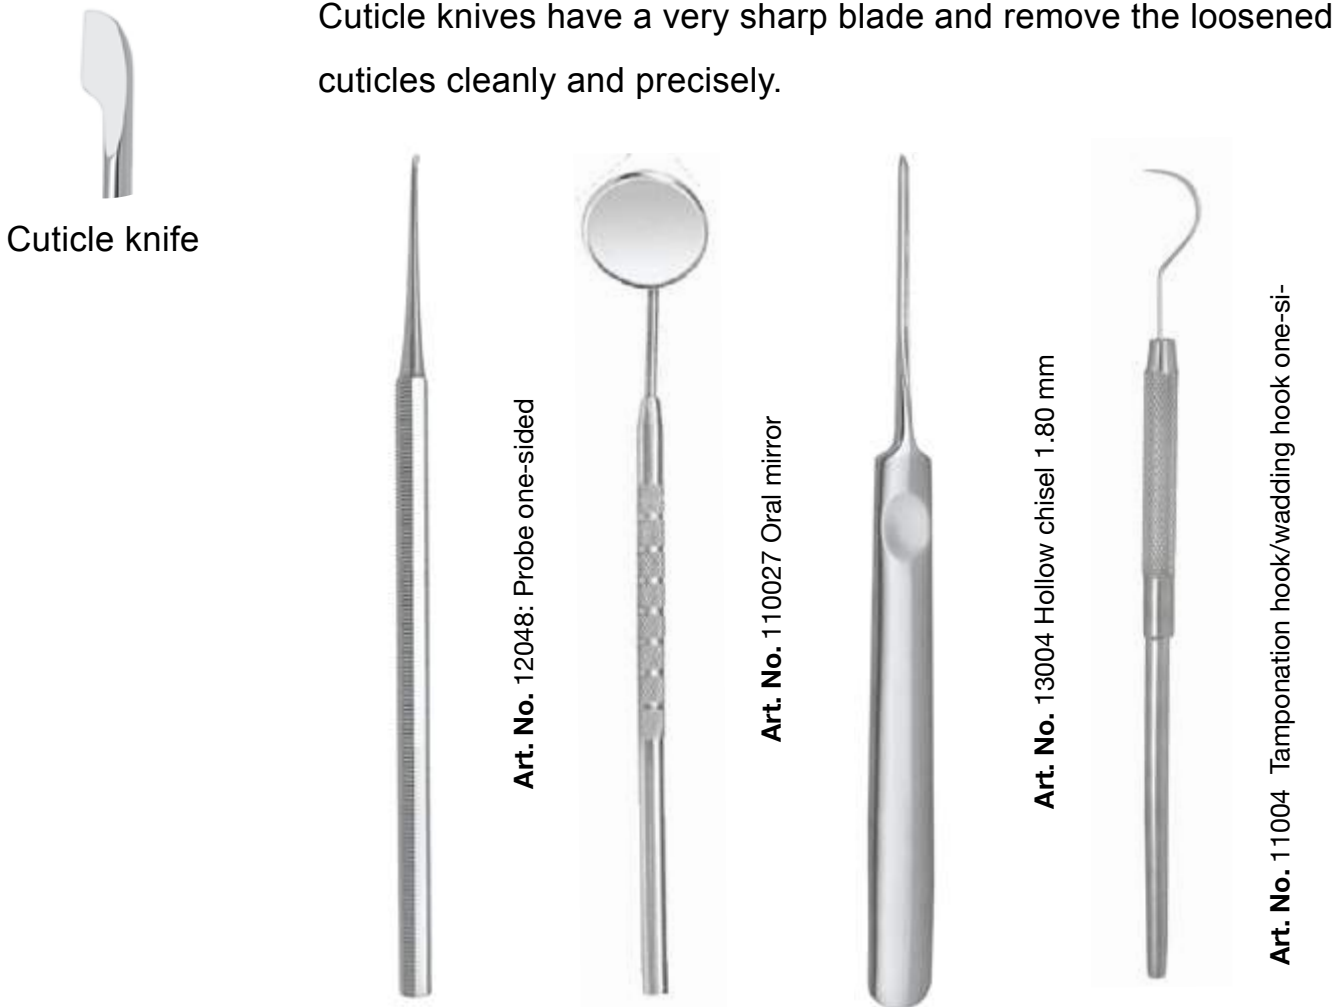

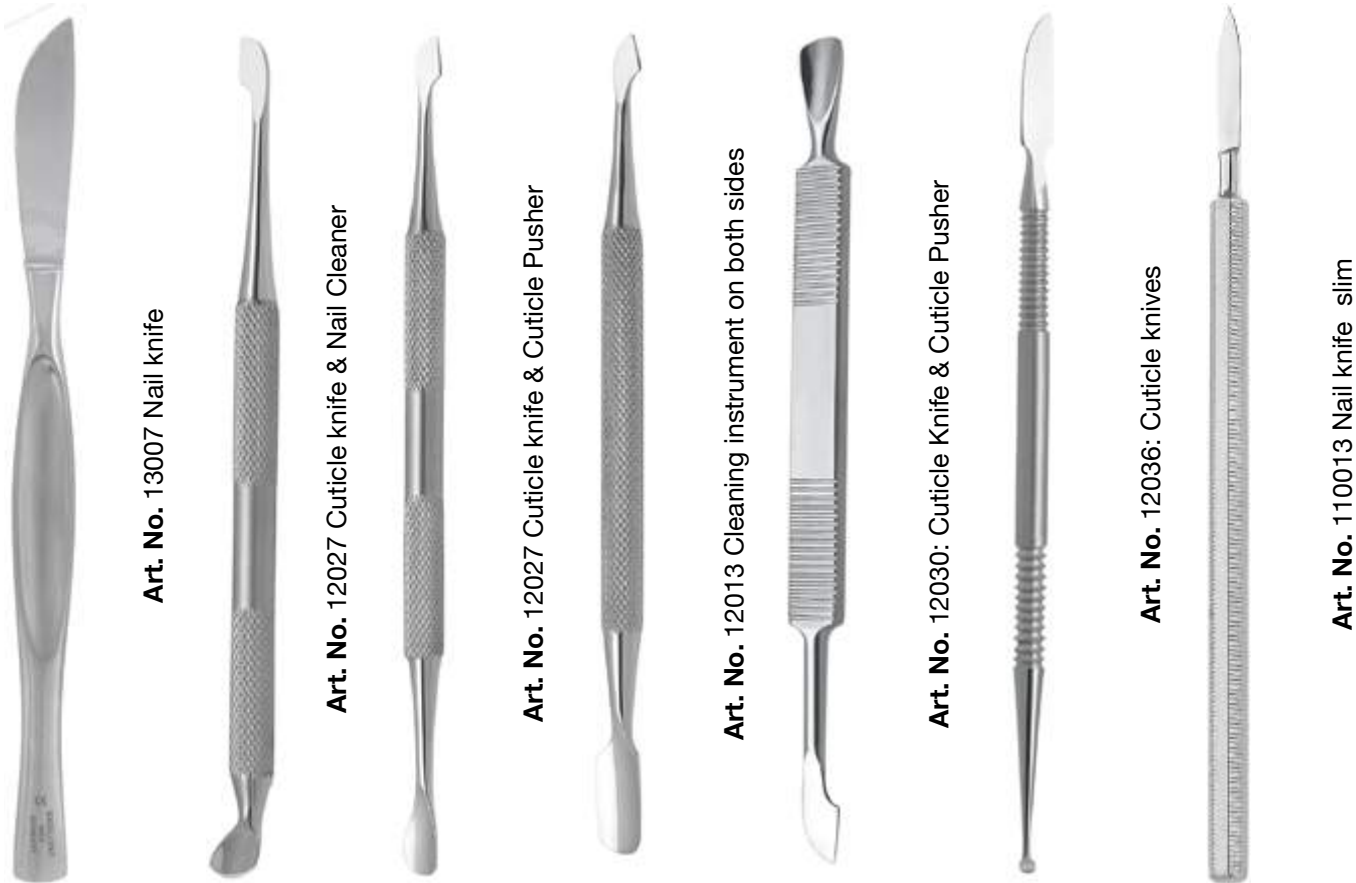

Corner file

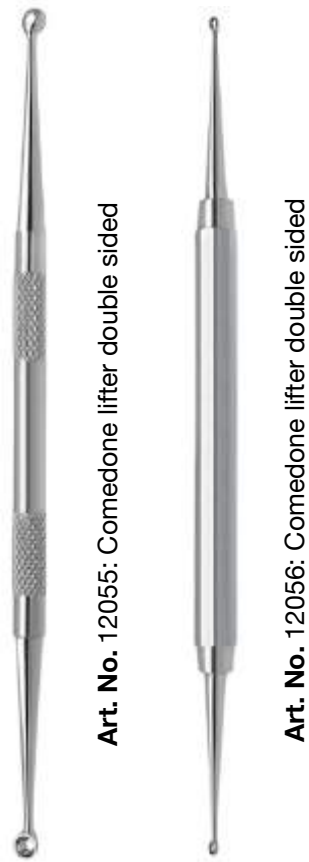

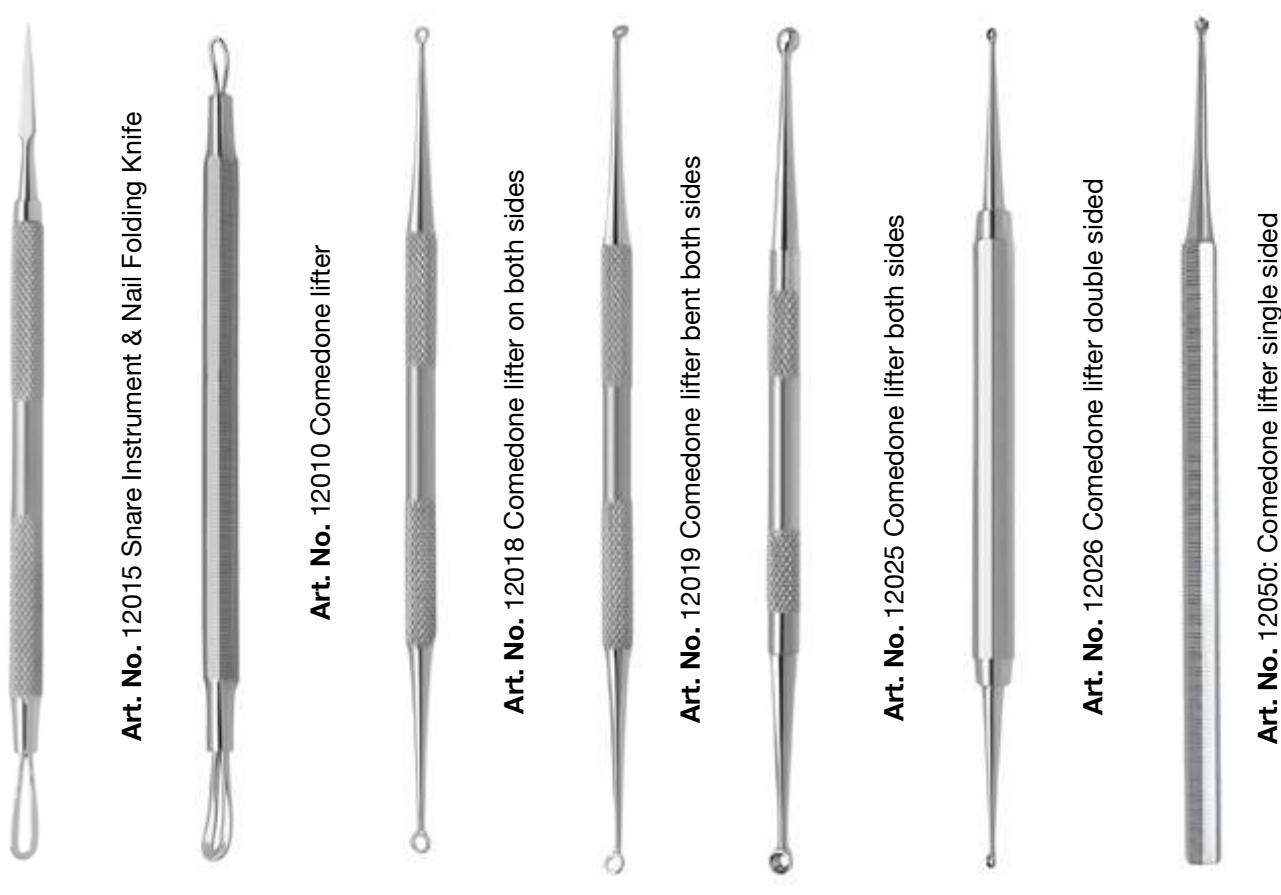

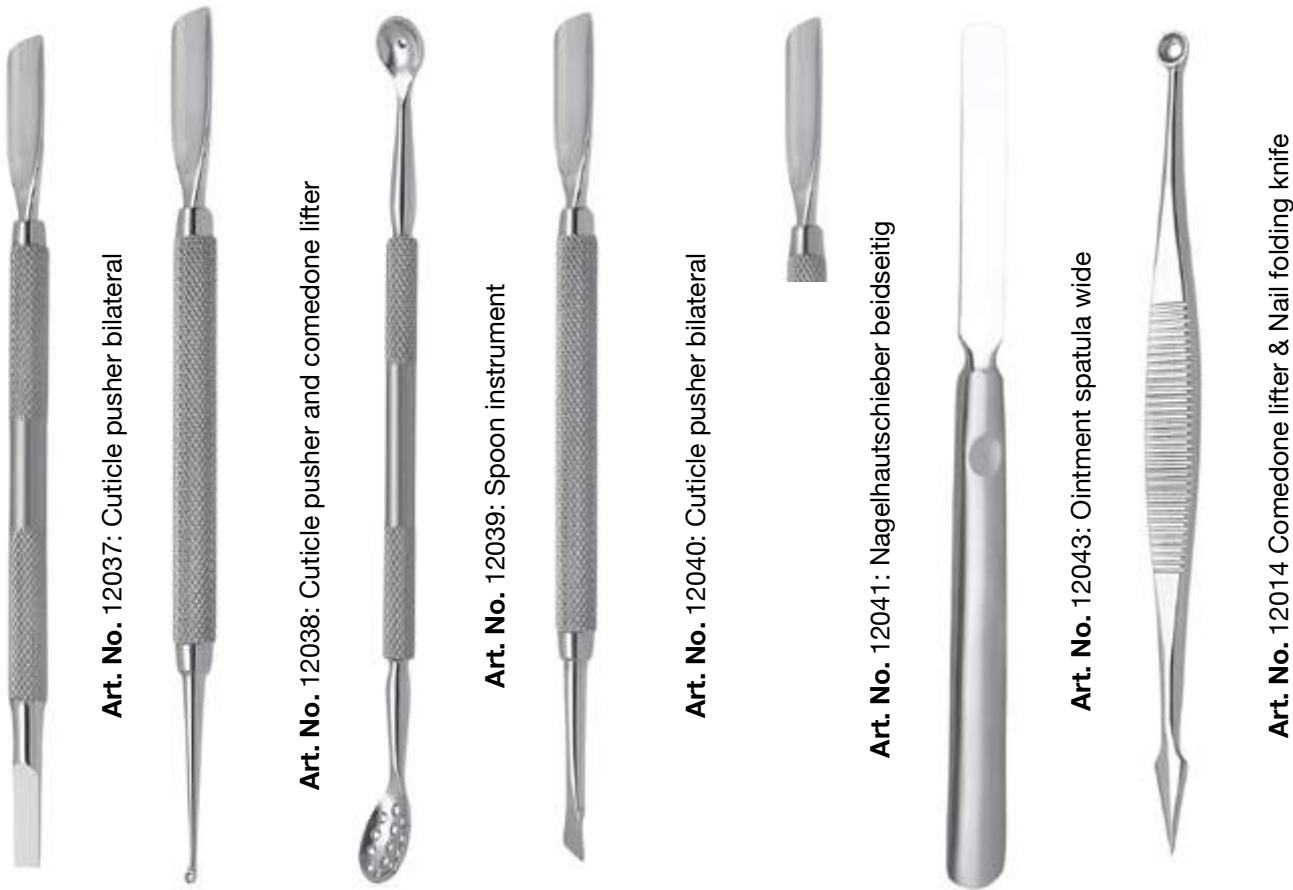

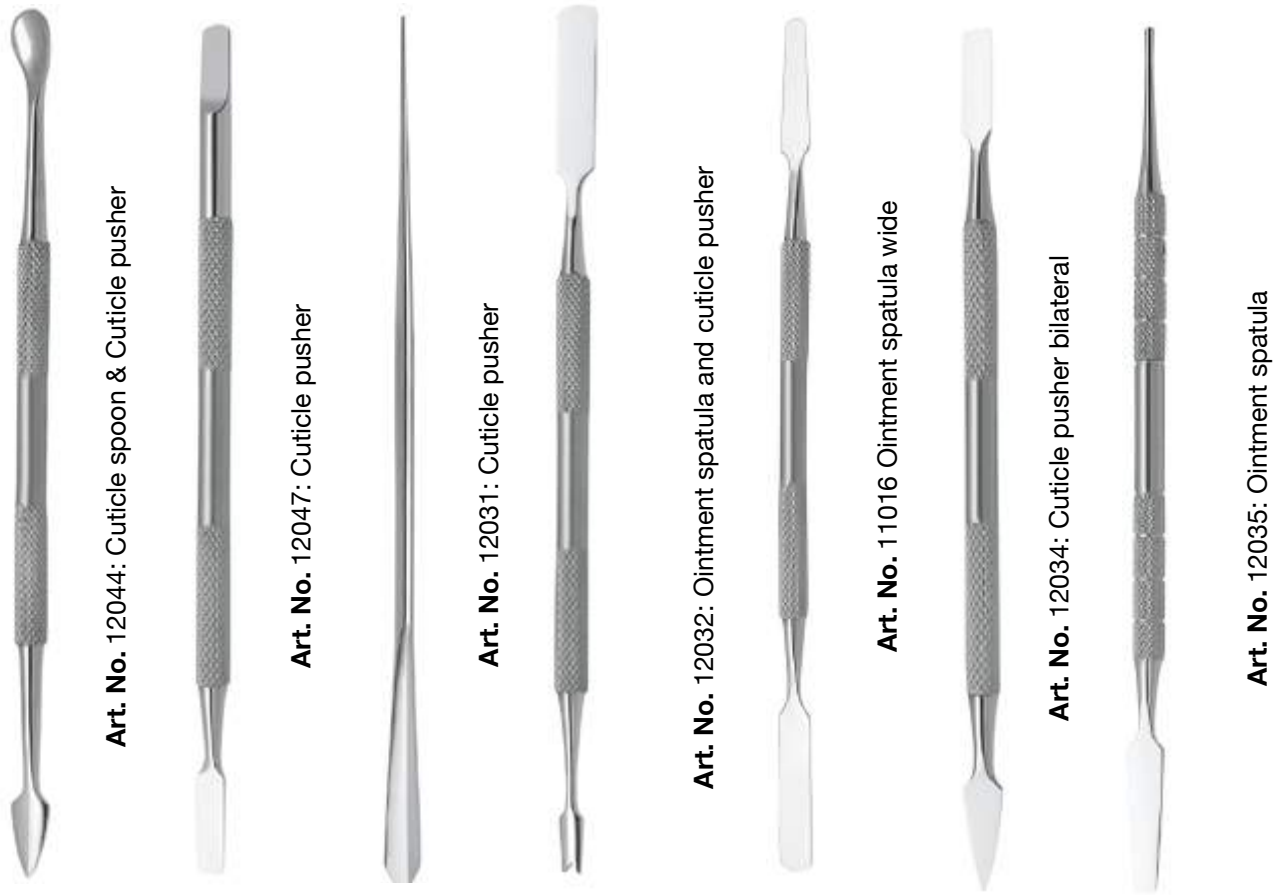

Corner files are used for filing toenails and fingernails. With different head shapes, these special double instruments also be used for nails that are difficult to access.

Nail cleaners and cuticle pushers are used to clean and probe the nail. Excellent nail cleaners can be used in combination with other double instruments for daily care of hand and toenails. Nail cleaners can also be used for gentle work on the nail fold, nail corners or cuticles. With different head shapes, these special double instruments can also be used for work on fingernails as well as toenails.

Excellent comedone lifters are particularly suitable for removing the unsightly dark blackheads in the skin. These instruments can also be used to remove pimples. By applying even pressure, clogging plugs can be gently lifted out of the skin thanks to the special head shapes made of rings, loops or thorns. In addition to practical handling, the advantage is above all hygiene, as the sterilized instruments prevent bacteria from penetrating the pores.

Art. No. 18011 - 17.0 cm

Different coatings (coarse or fine grit) allow you to use a rough side for pre-filing and a fine side for precise finishing. Excellent files can help you remove calluses quickly, effectively, easily and above all pleasantly. It is recommended to always file toenails straight and not round, so that the risk of the corners growing into the skin is minimized. In our assortment we have glass files, (diamond) nail files, sand blade files, polishing files, sapphire files, callus files as well as metal files.
